How to use this guide

This manual documents how NUVORA actually behaves — every rule quoted (join windows, enrolment expiry, escrow release, payout cadence) is the platform's real behaviour, not marketing prose. Where something is decided by staff policy rather than software, we say so and point you to support.

Fastest answer, any time: open the chat bubble on any NUVORA screen and ask — the assistant answers from this same rulebook and can hand you to a human. Email: support@nuvora.com.

What NUVORA is (and how it works)

NUVORA is a **curriculum-governed tutoring marketplace and virtual school**. It is not an "anyone-teaches-anyone" board: tutors pass staged vetting (subject assessments, document checks, interview, approval) before teaching, and everything is organised around real curricula and real exams.

Four ways to learn

Live cohorts

Scheduled group classes with fixed enrolment windows, a vetted tutor, lessons, assignments, attendance and exams. The flagship experience.

Private tuition

Request one-to-one tutoring; the team matches you with a vetted tutor, then you book a package.

Home tutors

In-person tutoring in supported areas — same request → match → teach pipeline.

Exam prep

Structured preparation programmes plus timed, CBT-style practice exams marked by the platform.

Curricula & exams covered

The idea that makes NUVORA safe to pay for

You pay

Money is HELD
(escrow)

Lessons are
delivered

Funds released
to the tutor

Your money never goes straight to a tutor. It sits in escrow while teaching happens, and releases on delivery — automatically after about **72 hours** if a completion goes unconfirmed. Everything about money is in **\$8**.

Where you can use NUVORA

Surface	Best for
Web — nuvora.com	Browsing the catalogue, checkout & payment, receipts, tutor vetting application, admin console, anything detailed.
Mobile app — Android & iOS	Daily learning: dashboards, joining lessons, messages, push notifications, practice exams, downloads for offline viewing. Purchases open the secure web checkout and drop you back in the app.

**One account everywhere**

The same email and password (or email code, or Google) works on web and the mobile app. Notifications, messages and progress stay in sync.

2.1 — Roles: one account, one or more hats

Role	Who it's for	What you can do
PARENT	Parents & guardians	Add and manage learners, enrol them, pay, message tutors, track progress, referrals
STUDENT (learner)	The person learning	Join lessons, submit assignments, sit practice exams, message within bookings
TUTOR	Teachers	Apply, pass vetting, teach, mark work, earn and receive payouts
INSTITUTION_ADMIN	Schools & companies	Manage an organisation account
ACADEMIC_ADMIN / SUPER_ADMIN	NUVORA staff only	Operations console — never self-assignable ; granted only by existing staff

Choosing & changing your role

You pick a starting role at sign-up (Parent, Student, or Become a tutor) and can change it later from your account. Staff roles can never be self-selected — a security rule enforced by the platform, not just the UI.

2.2 — Learners under 17

A learner **under 17 must be linked to a parent or guardian** to enrol. Parents create and manage learner profiles from their dashboard and oversee messaging. See [§10 Safety & safeguarding](#).

2.3 — Create your account

- 1 Open Sign up** — on the web homepage choose [Create account](#), or in the app tap **Create account**.
- 2 Enter your details** and choose your role.
- 3 Verify your email** — we email you a code/link. Until verified, your account is *pending* and sign-in asks you to verify first.
- 4 Finish onboarding** — profile → learners → goals. It takes about two minutes and powers your recommendations.

Verification email didn't arrive?

Check spam, then use **Resend verification**. If email delivery fails during sign-up, the flow lets you continue and verify shortly after — you won't lose your place. Still stuck? See [§15](#).

2.4 — Three ways to sign in

Method	How it behaves
Email + password	Standard. Repeated wrong attempts trigger a temporary lockout and rate limiting — that protection is intentional.
Email code (password-free)	Choose <i>Email me a sign-in code</i> . Entering it also proves email ownership and activates a pending account.
Google	One-tap Google sign-in on web and mobile.

2.5 — Passwords & sessions

- **Rules:** minimum 8 characters, at least one letter and one digit.
- **Forgot password:** request a reset code from the login page, then set a new password.
- **Changing your password signs out every other session and device** — including anyone who shouldn't be in your account. Do this first if you ever suspect access you don't recognise.
- **Staff accounts** require email MFA before a session is even issued.

Your parent dashboard is the control centre: learners, orders, lessons, payments, messages, referrals, certificates. Web and mobile show the same truth.

3.1 — Add a learner

Account → Learners → Add a learner: name, level, curriculum/exam track. You can manage several learners (siblings) from one account and switch context between them from the learner switcher.

3.2 — Find learning

- **Programmes** — structured courses by curriculum and level.
- **Cohorts** — scheduled class runs with a start date, tutor, capacity and an **enrolment window**.
- **Tutors** — public, vetted tutor profiles with moderated reviews.
- **Saved (wishlist)** — bookmark cohorts/programmes to shortlist them.
- **Recommendations** — the dashboard suggests cohorts open for enrolment, level-matched programmes and top-ranked tutors, *with a visible explanation of why each was suggested*.

3.3 — Enrol in a cohort, end to end

- 1 **Open the cohort** — check the timetable, tutor, seats left and price.
- 2 **Choose Enrol** and pick **which learner** the seat is for. Some cohorts use a join request that staff review and accept.
- 3 **Checkout** — review the order and apply a coupon if you have one. Totals are always computed by NUVORA server-side.
- 4 **Pay** — Paystack or Flutterwave: card, bank transfer, USSD (whatever the gateway offers). Prices are in Naira (₦).
- 5 **Land on your receipt** — it updates itself when the gateway confirms. You can tap **Verify now** to force an immediate check if it lingers.
- 6 **Confirmed** — the seat is locked in, the learner joins the roster, and confirmation + receipt arrive by email/WhatsApp.

i The rules that protect your seat (and your money)

Enrolment windows are real — cohorts open and close for enrolment on published dates; after the window ends, the page explains that enrolment is closed. **Unpaid checkouts expire after about 2 hours**, so an abandoned payment can never silently hold a seat you wanted. Every payment is reconciled against the gateway — you cannot pay "into the void".

3.4 — Private tuition (one-to-one)

Private tuition → Request: tell NUVORA the subject, level, preferred schedule and goals. The team reviews and **matches a vetted tutor**; the package then proceeds to booking and payment like a cohort order. Matched tutors and

sessions appear in your dashboards and messages. Home-tutor requests follow the same request → match path.

3.5 — Message safely

You can message a tutor **inside the scope of a booking** (a cohort or private package). Messaging is deliberately not an open social network — see the safeguarding design in **\$10**.

3.6 — Track learning

Lessons & attendance

Schedule, join status, attendance marks, tutor lesson notes, recordings and transcripts when published.

Assignments

What was set, what was submitted, grades and tutor feedback under Submissions.

Progress reports

Tutor-authored summaries of how your child is doing over time.

Practice exam results

Scores and per-question review for every CBT attempt.

3.7 — Reviews

After learning, leave a review on the tutor. Reviews are **moderated before they show publicly**, so the ratings you see are real and checked.

3.8 — Referrals

Account → Referral code: share your code or link. When someone signs up with it and completes their **first paid order**, the referral qualifies automatically and a **reward is credited to your NUVORA wallet**. One reward per first paid order; every qualified referral shows on your referral list. Current reward terms are shown on the referrals page.

3.9 — NUVORA Plus

A premium, **advisor-led** tier: priority matching with vetted specialist tutors and a dedicated advisor — built for families who want a guided experience, including international learners. See the NUVORA Plus page or ask in chat.

Home surfaces what's next — lessons today, assignments due, exams available, messages. Designed to be used daily, on your phone.

4.1 — Join a live lesson

- 1 **Open the lesson** from **My lessons** or the cohort page.
- 2 **Tap Join inside the join window** — it opens **15 minutes before** the start time and stays open while the lesson runs.
- 3 **You're in** — the session opens in the built-in meeting room right in your browser or app.

! Outside the window, Join stays closed — on purpose

The window is enforced by the platform so nobody can wander into the wrong class. If Join is greyed out, check the lesson time.

4.2 — During and after class

- **Attendance** is marked by your tutor and visible to you (and your parent, for linked learners).
- **Lesson notes** — tutors publish notes per lesson; you can add your own notes on the lesson page.
- **Recordings & transcripts** — if published, find them in **Recorded lessons** or on the lesson page. On mobile you can download recordings for **offline viewing**.
- **Resources & assignments** — materials, tasks and deadlines live on the cohort pages. Submit from the assignment page; grades and feedback appear under **Submissions**.

4.3 — Practice exams (CBT)

- 1 **Open Practice / Exams** and pick a paper — UTME (JAMB), WAEC, NECO, IGCSE, A-Level or SAT.
- 2 **Start attempt** — the timer runs **server-side**; answers save as you go.
- 3 **Submit** — scoring is done by the platform; your device is never trusted for marks.
- 4 **Review** — every attempt remains available: score, correct/incorrect, per-question breakdown.

✓ Crashed mid-exam?

Stale or abandoned attempts expire automatically, so a dead battery doesn't corrupt your record or block a fresh attempt.

4.4 — Messages & notifications

Chat with your tutor within your active bookings; get notified about lessons, grades and payments across in-app, push, email, SMS and WhatsApp (details in §11).

NUVORA tutors are vetted before they teach and paid weekly after escrow releases. This chapter covers the whole journey from application to payout.

5.1 — Becoming a tutor: the vetting pipeline

- 1 **Profile** — basics, bio, strengths, and **bank details verified against the live bank list** (account name resolution happens before you ever earn).
- 2 **Subjects** — pick the subjects and levels you want to teach.
- 3 **Subject assessments** — timed, platform-marked assessments per subject.
- 4 **Documents** — ID and credentials uploaded to a secure private store; uploads are **malware-scanned** on ingestion.
- 5 **Interview** — the team schedules and records an interview outcome.
- 6 **Verification → Decision** — approved, held, or declined, with reasons. Track every step under **Become a tutor → Status**.

Approved and listed: your public profile shows subjects, reviews and rating. Bank-detail changes and sensitive edits trigger security notifications.

5.2 — Availability

Set weekly **availability** plus **exceptions** (days off, one-off blocks) in your tutor console. Scheduling — and the double-booking guard — use it.

5.3 — Teaching toolkit

Tool	What you do with it
Schedule / My lessons	What's coming up, who's enrolled; open/refresh the meeting link when it's time.
Attendance & notes	Mark attendance per lesson; publish lesson notes.
Recordings & transcripts	Publish recorded video and transcripts to the class library.
Assignments	Create, collect and grade submissions with feedback.
Practice exams	Author CBT papers; review attempts and results per student.
Progress reports	Write per-learner reports that parents read in their dashboard.

5.4 — Money: earnings & payouts

- **Earnings** shows accrued, released and paid amounts per class.
- **Payouts run weekly** to your verified bank account — automatic via Paystack Transfers where configured (a transfer **OTP** may be required to complete), otherwise confirmed manually by the finance team. Either way every payout shows its status and you're notified on payment (WhatsApp/email).
- **Fail-closed by design:** in production a payout can never be recorded as "paid" unless a real transfer was made and verified — mock payouts are impossible.

5.5 — Rescheduling & cancellations

Tutors (or staff) can **reschedule** a lesson — learners are notified automatically — or **cancel** one, which frees your calendar (cancelled lessons are treated as free time by the double-booking guard). Note: late-cancellation patterns are visible to staff in the tutor console, so treat published schedules as commitments.

NUVORA supports B2B arrangements: schools, corporate training and institution accounts with their own administrative scope.

- **Register an organisation** from the For schools / corporate training pages — institution accounts get their own admin-scoped surface.
- **Orders & enrolments ride the same rails** as families: escrowed payments, LMS access, attendance and reporting.
- **Admissions** — formal intake applications (apply → track status → decision) live under **Account → Admissions**.
- **Institution admins** manage their own members; platform staff retain oversight for vetting and payments.

Partnership details

Pricing and volume arrangements are handled by the partnerships team — use **Contact** or the in-app chat and ask for institutions.

For NUVORA staff accounts only. Signing in requires emailed **MFA**, and every privileged action is **audit-logged**. Role changes and account status changes are reserved for **SUPER_ADMIN**.

Area	What staff do there
Overview & analytics	Funnel, revenue, fill rates, CBT analytics, lessons today.
Users & roles	Accounts, roles, statuses — audited; SUPER_ADMIN only for grants/suspensions.
Vetting queue	Review profiles, assessments, documents; interviews; approve / reject / hold / suspend.
Cohorts & programmes	Create and publish, enrolment windows, tutor assignment, rosters, banners, join requests.
Lessons	Scheduling, recorded video, attendance report exports (CSV).
Payments & payouts	Orders, manual bank-transfer confirmation, refunds, weekly payout runs (Paystack transfer + OTP), revenue CSV.
Leads & support	Marketing leads, support tickets, agent chat inbox with CSAT scores and export.
Content	Blog CMS (draft / scheduled / published / archived), testimonial publish toggles.
Admissions, institutions, referrals, reviews	Decisions, B2B accounts, programme oversight, review moderation queue.
Certificates	Issue cohort certificates, verification lookups.

Money & privileges are double-gated

Refunds and role grants are intentionally gated. All state changes to money or access are written to the audit log with the actor, timestamp and before/after state.

8.1 — How you pay

- **Gateways:** Paystack (primary) and Flutterwave. Available methods come from the gateway — cards, bank transfer, USSD.
- **Currency:** Naira (₦).
- **Coupons & wallet credit** discount the **server-computed** total — the platform never trusts a price sent by your browser.
- **Checkout on mobile** opens the same secure web checkout and returns you to the app — one audited payment path everywhere.

8.2 — Escrow: the core protection

- If completion isn't confirmed after delivery, eligible holds **auto-release about 72 hours** later — the same confirm-or-3-day model used by established Nigerian tutoring platforms.
- Gateway notifications are **verified and idempotent**: a notification delivered twice (or fifty times) settles the order **exactly once**. Amount and currency are reconciled against your order before anything is marked paid.
- If a gateway notification is slow or lost, your **receipt page polls** and the **Verify now** button asks the server to check the gateway directly through the same protected path. You can also close the tab — nothing depends on keeping it open.

8.3 — Receipts & orders

Everything under **Account → Orders**: order number, items, payments and printable receipts, each deep-linkable from web and mobile.

8.4 — Refunds

- Start a refund from support (in-app chat / support@nuvora.com) with your **order number**.
- When approved, NUVORA **attempts the gateway refund first**, and only marks the order refunded after the gateway succeeds. In production, refunds are impossible without a configured gateway secret — fail-closed, not best-effort.
- Cancelled lessons free the tutor calendar; expired/unpaid enrolments release seats automatically; coupon and referral discounts are reconciled at order time.

8.5 — If something looks wrong

What you see	What to do
"I paid but the site says pending"	Open the receipt → Verify now . Still pending? Chat support with the order number — staff can reconcile manually. You will not be double-charged.

What you see	What to do
A second debit alert from your bank	Gateways sometimes send provisional alerts; NUVORA settles each order exactly once. Genuine duplicates are reversed via the refund path.
Payment page closed mid-flow	Checkout resumed is safe: an unpaid reservation expires (~2 hours) and you can simply re-checkout while seats and the enrolment window remain.

- Complete an eligible cohort and staff issue your **certificate** — find it under **Account → Certificates**.
- Each certificate carries a **public verification link**: schools and employers can confirm it's genuine at the verify page **without needing an account**.
- Certificates list the programme, learner, completion details and issue date as recorded at issuance.

NUVORA teaches children, so the platform is built around that fact — not around growth hacks.

Linked minors

Learners under 17 enrol only when linked to a parent or guardian, who oversees their activity.

Booking-scoped messaging

Learners and tutors message inside a class or booking context. There is no open stranger-to-child DM system.

Vetted tutors only

Assessments, documents, interview, ongoing review — and suspension powers the moment standards slip.

Privacy by default

Personal contact details are not exposed between parties. Data export and deletion are one tap away (\$14).

Payments privacy

Your card is never exposed to NUVORA — the gateways process it. NUVORA stores references and reconciliation data, never card numbers.

Report a concern

In-app chat → "human" → immediate attention from the team, or email support@nuvora.com. Safeguarding concerns go straight to the front of the queue.

Channel	What arrives there
In-app bell	Everything: lessons, grades, payments, messages. Unread counts sync across web and mobile; read-all is available.
Push (mobile)	Time-sensitive learning events. Manage devices under Account → Devices ; sign-out removes your device.
Email	Receipts, verification, onboarding tips, summaries.
SMS	Time-sensitive notices where enabled.
WhatsApp	Payout confirmations, payment nudges and similar — with email fallback if a channel fails.

Nudges are deliberately restrained — a payment reminder goes out only inside a defined window after an abandoned checkout, not as a drip of spam.

The chat bubble (web) / Chat tab (mobile) opens the **NUVORA assistant**:

- Answers questions about accounts, enrolment, escrow, lessons, becoming a tutor and safeguarding — **grounded in NUVORA's own knowledge**, not generic internet filler.
- It **cannot move money or change your account** — payments, refunds and account actions are deferred to humans by design.
- Say "**human**" (or accept its offer) to escalate: the thread lands in the agent inbox and a person replies in the same thread.
- You can **rate the conversation** afterwards; ratings feed support quality analytics.
- Messages are **scrubbed of sensitive details** (like card numbers) before the assistant reads them.

Never a dead end

If the assistant service is briefly unavailable or its daily budget is exhausted, you get an immediate "a human from the NUVORA team will pick this up shortly" handoff — the chat never just breaks.

13.1 — Install & keep current

- **Android:** install the signed APK from the official download page (or the store listing where available). The app receives **over-the-air updates on launch** — keep them on.
- **iOS:** via the official listing/TestFlight where available.
- **Deep links:** nuvora.com links open straight into the app when it's installed.

13.2 — Getting around

Primary tabs: **Home · Learning · Messages · Notifications · Account**. Cohorts, practice exams, referrals, saved items, the tutor console and (for staff) the admin console hang off those. Dark/light **theme toggle** in the header; animations respect reduced-motion settings.

13.3 — Offline & low networks

- A clear **offline screen** tells you when there's no connection — reopen or retry once you're back.
- **Recorded lessons download for offline viewing** from the lesson/recorded library.
- Live updates use a light "new content" signal; if it drops, the app falls back to periodic refresh — **your messages are never lost**.

13.4 — Payments on mobile

Purchases open the secure web checkout and return you to the app when done — deliberate, so money flows through the same verified path on every device.

13.5 — Sign-in & security on mobile

- Email + password, email code, or Google. Your session is stored in the **device keychain** (OS-secured storage).
- If your session expires you're routed to sign-in — and only then; browsing public screens never silently logs you out.

Action	Where / what happens
Edit profile & photo	Account → Profile. Avatar uploads are size-limited and scanned.
Manage devices	Account → Devices — see and revoke signed-in mobile devices.
Export your data	Account → Export — a download of the data NUVORA holds on you.
Delete your account	Account → Delete. Permanent: personal data is removed; audited financial records are retained only as required for compliance.
Security basics	Passwords bcrypt-hashed; sessions revocable; password change revokes all sessions; staff actions audited; platform analytics carry no personal data and no advertising trackers exist.

Problem	Fix
No verification email	Spam folder → Resend verification → still nothing: use Email me a sign-in code (it also activates a pending account), or contact support.
Locked out of sign-in	Too many attempts — wait a few minutes; the cooldown lifts automatically.
Payment stuck "pending"	Receipt page → Verify now ; check your bank app; then chat with support quoting the order number.
Can't join a lesson	Join opens ~15 minutes before the start; confirm the schedule; the tutor opens the room — message them in the class thread if it's time and the door's still closed.
Checkout lost my seat	Unpaid reservations expire (~2 hours). Re-checkout while the enrolment window and seats remain.
App says I'm offline	Check connection, try again; force-close and reopen if needed. Downloads remain watchable offline.
Push not arriving	Account → Devices: re-register the device; check the OS notification permission for the app.
Google sign-in fails	Allow pop-ups/redirects for nuvora.com, or use email + password / email code instead.
Tutor: payout pending	Payouts run weekly. Check bank details are verified; watch for a transfer OTP step; ask support with the payout ID if it outlasts the cycle.
My tutor review isn't public	Reviews publish after moderation — that's what keeps ratings trustworthy.
Exam attempt got stuck	Stale attempts expire automatically; start a fresh attempt from the exam page.
Something else entirely	Chat → <i>"human"</i> , or email support@nuvora.com with screenshots and any order/lesson IDs.

Is NUVORA a school?

It runs school-grade structures — curricula, cohorts, assessments, progress reports, certificates — delivered by vetted tutors. Formal accreditation tracks are on the roadmap (see Admissions).

Who can teach?

Anyone may *apply*. Only candidates who pass subject assessments, document checks and interview can *teach*.

When do tutors get paid?

Funds sit in escrow while teaching is delivered, then release (automatically ~72h after delivery if unconfirmed) into the weekly payout run.

Can I get a refund?

Approved refunds route back through the original gateway. Open a support chat with your order number to start one.

Which exams are supported?

UTME (JAMB), WASSCE (WAEC), SSCE (NECO), IGCSE, A-Level and SAT — plus GRE/GMAT preparation tracks, each with per-exam topic coverage.

Which curricula?

Nigerian and British, with level and subject mapping across the whole catalogue.

Is there a free trial?

Promotions vary by cohort — watch the pricing page, coupons and the referral programme.

Does the AI tutor my child?

No. The AI only helps with *support* questions and hands off to humans. All teaching is by vetted human tutors.

Is my child's data sold or used for ads?

No advertising trackers; analytics are aggregate and privacy-friendly. Export or delete your data any time (\$14).

Can I use NUVORA outside Nigeria?

Yes — it serves Nigerian and British curriculum families anywhere (NUVORA Plus is built with international learners in mind). Payments settle in Naira.

Term	Meaning
Cohort	A scheduled run of a programme with a tutor, seats and an enrolment window
Programme	A structured course defined by curriculum, level and subject
Escrow	Your payment held safely and released as learning is delivered (~72h auto-release if unconfirmed)
Vetting	The multi-stage tutor approval pipeline: assessments → documents → interview → decision
CBT	Computer-based testing — timed practice exams marked by the platform
LMS	Learning management: lessons, resources, assignments, submissions, progress
Join window	The window (opening ~15 minutes before start) in which a live lesson link works
Enrolment window	The published dates during which a cohort accepts learners
Wallet	Your NUVORA credit balance (e.g., referral rewards)
Learner	A student profile — especially one managed by a parent/guardian
NUVORA Plus	Premium, advisor-led matching tier
Order / Receipt	The record of a purchase and its proof of payment
CSAT	The satisfaction rating you give a support conversation
MFA	Multi-factor authentication — an emailed code required for staff sign-in

You're set.

One rule of thumb if you remember nothing else: **your money is safe until your learning happens** — and the chat bubble on any screen gets you a person whenever you need one.

SUPPORT	support@nuvora.com — or in-app chat → “human”
WEB	nuvora.com
MOBILE	NUVORA app (Android & iOS) — search or use the download page
SAFEGUARDING	Report from the chat or email — handled first, always
